MURRAY STATE UNIVERSITY

Year Ended June 30, 2001

Note 1.

Murray State University (the University) is a state supported institution of higher education located in Murray, Kentucky and is accredited by the Southern Association of Colleges and Schools. The University awards graduate and undergraduate degrees and serves a student population in excess of 9,100. The University is a component unit of the Commonwealth of Kentucky.

The financial statements of the University have been prepared in accordance with the AICPA Industry Audit Guide "Audits of Colleges and Universities". The statement of current funds revenues, expenditures, and other changes is a statement of financial activities of current funds related to the current reporting period. It does not purport to present the results of operations or the net income or loss for the period as would a statement of income or a statement of revenues and expenses.

To the extent that current funds are used to finance plant assets, the amounts so provided are accounted for as (1) expenditures, in the case of normal replacement of movable equipment and library books; (2) mandatory transfers, in the case of required provisions for debt amortization, interest and equipment renewal and replacement; and (3) transfers of a non-mandatory nature for all other cases.

To ensure observance of limitations and restrictions placed on the use of the resources available to the University, the accounts of the University are maintained in accordance with the principles of "fund accounting". This is the procedure by which resources for various activities are classified for accounting and reporting purposes into funds that are in accordance with activities or objectives specified. Separate accounts are maintained for each fund; however, in the accompanying financial statements, funds that have similar characteristics have been combined and reported as five balanced fund groups: current funds, loan funds, endowment funds, plant funds, and agency funds. Accordingly, all financial transactions have been recorded and reported by fund group. Within each group, fund balances restricted by outside sources are so indicated and are distinguished from unrestricted funds allocated to specific purposes by action of the University's Board of Regents. Externally restricted funds may be utilized only in accordance with the purposes established by the source of such funds and are in contrast with unrestricted funds over which the University retains control to use in achieving its institutional purposes.

Current funds are used primarily to account for the transactions affecting the general operation of the University. These resources are expendable for performing the primary and support objectives of the University. Restricted gifts, grants, appropriations, and other restricted resources are accounted for in the appropriate restricted funds. Restricted current funds received from non-exchange transactions are reported as revenues and expenditures in the period received provided all recognition criteria are met. Restricted current funds received from exchange transactions are reported as revenues and expenditures when expended for current period operating purposes.

The loan funds group is used to account for loan programs available to students and financed primarily by the Federal government.

Endowment funds are those for which donors, the Commonwealth, or other external agencies have stipulated, under the terms of the instrument creating the fund, that the principal is not expendable. That is, it is to be maintained inviolate and in perpetuity, and is to be invested for the purpose of producing current and future income which may be expended or added to principal.

MURRAY STATE UNIVERSITY

Year Ended June 30, 2001

Note 1.

(

Plant fund groups are used to account for the transactions relating to investment in University property. Plant fund subgroups include (1) unexpended plant, (2) renewals and replacements, (3) retirement of indebtedness, and (4) investment in plant. The unexpended plant subgroup consists of funds to be used for the acquisition and/or construction of physical properties for institutional purposes but unexpended at the reporting date. The renewals and replacements subgroup consists of funds to be expended for renewals and replacements of plant fund assets, including some renewals and replacements of a type not ordinarily capitalized in the investment in plant subgroup. The retirement of indebtedness subgroup consists of funds set aside for debt service reserves and charges, and for retirement of indebtedness on institutional properties. The investment in plant subgroup consists of funds expended for and thus invested in institutional properties and the bond indebtedness incurred to finance plant acquisitions and construction. Physical plant and equipment are stated at cost at the date of acquisition or at fair market value at the date of donation for gifts.

Agency funds are used to account for assets held by the University as custodian or fiscal agent for others and used for certain organized activities.

All gains and losses arising from the sale, collection or other disposition of investments and other noncash assets are accounted for in the funds which owned such assets. Ordinary income derived from investments, receivables, and the like is accounted for in the fund owning such assets, except for income derived from investments of endowment funds, which income is accounted for in the fund to which it is restricted.

The University's policy is to treat cash in local checking accounts and cash held by the Commonwealth for the University as cash and cash equivalents.

Equity securities with readily determinable fair values and debt securities are reported at fair value.

Inventories are stated at the lower of cost (first-in, first-out method) or market.

Assets held by the Murray State University Foundation (the "Foundation") represent resources neither in the possession nor the control of the University, but are held and administered by the Foundation. The Foundation is governed by an independent board. The University recognizes gifts and donations made to the Foundation for the exclusive use and benefit of the University as assets and revenues of the University. The University recognizes the assets held by the Foundation at the estimated fair value of the assets or the present value of the future cash flows when the University is notified of the existence of the gift or the endowment.

MURRAY STATE UNIVERSITY

Year Ended June 30, 2001

Note 1.

Revenues of summer school academic terms are reported in the fiscal year in which the programs are predominantly conducted. Therefore, deferred tuition revenue is recorded for terms which have not begun at fiscal year end. Revenues of exchange or exchange-like transactions (for example, grants and private contracts) are reported in the fiscal year in which the terms of the grant or contract award is met. Therefore, deferred revenue is recorded pending completion of the award terms.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to use estimates and assumptions. The accompanying financial statements include estimates for items such as allowances for doubtful accounts and loans receivable, self- insurance liabilities and other accrued liabilities. Actual results could differ from those estimates.

In November 1999, the GASB issued Statement No. 35, "Basic Financial Statements – and Management's Discussion and Analysis – for Public Colleges and Universities." This statement establishes accounting and financial reporting standards for public colleges and universities within the financial reporting guidelines of GASB Statement No. 34, "Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments" as amended by GASB No. 37, "Basic Financial Statements and Managements' Discussion and Analysis – for State and Local Governments: Omnibus" and GASB No 38, "Certain Financial Statement Note Disclosures". GASB No. 35 has the effect of changing the financial reporting requirements for basic financial statements for public colleges and universities under accounting principles generally accepted in the United States of America. This statement is effective for financial statements for fiscal years beginning after June 15, 2001. It is expected that the adoption of Statement No. 35 will have a material effect on the University's financial statements. Among other things, net assets (currently referred to as fund balances) will be reduced due to the requirement of this Statement to recognize depreciation on all capital assets. Additionally, the content and presentation of the basic financial statements will be significantly revised under this Statement, including the addition of management's discussion and analysis as required supplementary information.

Certain reclassifications have been made to the 2000 amounts to conform to the 2001 presentation.

Note 2.

The University currently uses commercial banks and the Commonwealth of Kentucky as depositories. Deposits with commercial banks are covered by Federal depository insurance or collateral held by the banks in the University's name. At the Commonwealth level, the University's accounts are pooled with other agencies of the Commonwealth. These Commonwealth pooled deposits are substantially covered by Federal depository insurance or by collateral held by the bank in the Commonwealth's name. The investments of the University not held in the Commonwealth investment pool are insured or registered, or are held by the University or by an agent in the University's name.

Less amount representing interest	(989,735)
Present value of capital lease obligations	<u>\$ 2,190,899</u>

MURRAY STATE UNIVERSITY

Year Ended June 30, 2001

Note 11.

The University has been named as defendant in various lawsuits. It is the opinion of management and its legal counsel, based in part on the doctrine of sovereign immunity and other statutory provisions, that the ultimate outcome of litigation will not have a material effect on the future operations or financial position of the University.

On September 18, 1998, a fire damaged one of the University's student housing units and one student resident wadunits and one student llyal effec445t is the posit445t d one
